

Serial No. 10/728,879

Attorney Docket No. 113708.127 US2

**LISTING OF CLAIMS:**

Claims 1-13 (Canceled)

14. (Original) A method of utilizing an intellectual property thesaurus, the method comprising:

- (a) designating a field of search based on selection of at least one of a plurality of classifications of an intellectual property classification system;
- (b) generating a list of words found in intellectual property information classified in the field of search designated in said designating step (a);
- (c) entering search criteria utilizing keywords; and
- (d) determining searchable elements related to keywords in the search criteria based on the list of words generated in said generating step (b).

15. (Original) The method of utilizing an intellectual property thesaurus as recited in claim 14, wherein said generating step (b) further comprises the step of determining a frequency of occurrence of each listed word found in the intellectual property information associated with the field of search.

16. (Original) The method of utilizing an intellectual property thesaurus as recited in claim 15, further comprising the step of:

- (e) displaying, in the form of a word-frequency list, the list of words found in the intellectual property information classified in the field of search, wherein each listed word is associated with a corresponding frequency of occurrence of the listed word.

Serial No. 10/728,879

Attorney Docket No. 113708.127 US2

17. (Original) The method of utilizing an intellectual property thesaurus as recited in claim 16, wherein said displaying step (e) comprises simultaneous display of the search criteria during operation of said entering step (c) and the display of the word-frequency list.

18. (Original) The method of utilizing an intellectual property thesaurus as recited in claim 14, wherein said entering step (c) comprises entering keywords that formulate a search query; and wherein said determining step (d) comprises:

determining searchable elements related to select keywords in the search query by locating words on the list generated in said generating step (b) that are synonyms of select keywords in the search query; and

storing the synonyms thus determined in an accrued synonym list corresponding to the select keywords in the search query.

19. (Original) The method of utilizing an intellectual property thesaurus as recited in claim 18, wherein said determining step (d) is automatically performed to determine synonyms for keywords in the search query.

20. (Original) The method of utilizing an intellectual property thesaurus as recited in claim 18, wherein said entering step (c) further comprises the step of automatically incorporating into the search criteria synonyms from the accrued synonym list.

21. (Original) The method of utilizing an intellectual property thesaurus as recited in claim 17, further comprising the step of:

(f) submitting the search criteria as a search query to the database.

Serial No. 10/728,879

Attorney Docket No. 113708.127 US2

22. (Original) The method of utilizing an intellectual property thesaurus as recited in claim 21, wherein said submitting step (f) includes transmission of the search query to a remote database over the Internet.

23. (Original) In a search system for use in searching for intellectual property information, the improvement comprising an article of manufacture having stored thereon an executable program operative to effectuate searching for intellectual property information in connection with the search system, wherein the executable program is executed to perform the steps of:

(a) designating a source grouping comprising at least one document having intellectual property information;

(b) generating a list of words found in the at least one document in the intellectual property information within the source grouping designated in said designating step (a); and providing at least a portion of the elements in the list for later use as search criteria.

24. (Original) The article of manufacture of claim 23, wherein the executable program is executed to perform the additional steps of

(c) formulating search criteria utilizing input keywords; and

(d) determining searchable elements related to the input keywords in the search criteria based on the list of words generated in said generating step (b).

Serial No. 10/728,879

Attorney Docket No. 113708.127 US2

25. (Original) The article of manufacture of claim 24, wherein said determining step (d) comprises:

determining searchable elements related to select keywords in the search criteria by locating words on the list generated in said generating step (b) that are synonyms of select keywords in the search criteria.

26. (Original) The article of manufacture of claim 25, wherein said designating step (a) further comprises:

receiving input signals from a user containing a selection of at least one of a plurality of classifications of an intellectual property classification system; and

designating the source grouping as a field of search based on the input selection from the user.

27. (Original) The article of manufacture of claim 26, wherein the classification system is the system used by the U.S. Patent and Trademark Office for classification of patents, and wherein the input signals contain a selection of a plurality of classes and subclasses that form the source grouping.

28. (Original) The article of manufacture of claim 25, wherein the source grouping includes selected intellectual property information stored in a database, and wherein said generating step (b) includes the step of retrieving the selected intellectual property information from the database and compiling the list of words found in the retrieved intellectual property information.

Serial No. 10/728,879

Attorney Docket No. 113708.127 US2

29. (Original) The article of manufacture of claim 25, wherein said formulating step (c) automatically adds to the search criteria the synonyms determined in said determining step (d) search criteria utilizing input keywords.

30. (Original) The article of manufacture of claim 29, wherein the executable program further comprises the step of:

outputting the search criteria to a user interface; and  
accessing at least one remote database unit for intellectual property  
information corresponding to the search criteria.

31. (Original) The article of manufacture of claim 30, wherein said outputting step further comprises the step of simultaneously displaying a word-frequency list and the search criteria, wherein the word-frequency list is a list of all the words appearing in the source grouping, together with the frequency of occurrence in the source grouping.
